SBI EVERSPIN Advances Initiatives to Strengthen Business Continuity Capabilities
– Six Internal Evacuation Drills Conducted, Alongside Employee BCMS Training,
with Further Scenario-Based Exercises Planned–

SBI EVERSPIN Co., Ltd. (Head Office: Minato-ku, Tokyo; Representative Director & President: Jamyung Yoon; hereinafter “the Company”), a consolidated subsidiary of SBI Holdings, Inc. (Head Office: Minato-ku, Tokyo; Representative Director, Chairman, President & CEO: Yoshitaka Kitao) and a provider of AI-based cybersecurity solutions, is working to ensure employee safety and strengthen its business continuity capabilities to prepare for disasters and other emergencies.

As part of these efforts, SBI EVERSPIN conducted a total of six internal evacuation drills by October 1, 2026, while also providing internal training on its Business Continuity Management System (BCMS). Going forward, the Company plans to conduct additional exercises based on multiple scenarios, including power outages.

Through these training and educational initiatives, SBI EVERSPIN will continue to enhance its emergency response capabilities and advance preparations toward obtaining international BCMS certification.

■ **Background of the Initiative**

SBI EVERSPIN provides cybersecurity solutions to financial institutions and other businesses. As a company that supports its customers’ business operations, SBI EVERSPIN places great importance not only on ensuring stable operations under normal circumstances, but also on maintaining critical business functions and enabling prompt recovery, when necessary, in the event of disasters or other emergencies.

Based on this approach, SBI EVERSPIN is working to enhance each employee’s understanding and ability to respond appropriately, while strengthening its business continuity preparedness across the organization.

■ **Internal Evacuation Drills and BCMS Training**

SBI EVERSPIN conducted a total of six internal evacuation drills to ensure that employees can act safely and appropriately in the event of a disaster. Through ongoing drills, the Company aims to help employees become familiar with emergency evacuation procedures and use insights gained from these exercises to further improve its emergency response measures.

SBI EVERSPIN has also conducted internal training on its Business Continuity Management System (BCMS) to deepen employees’ understanding of the importance of business continuity. By combining education with practical exercises, the Company aims to enhance emergency response

capabilities across the organization.

■ Planned Exercises Based on Multiple Scenarios

Going forward, SBI EVERSPIN plans to conduct a series of exercises based on multiple scenarios, including power outages. Through these scenario-based exercises, the Company will review its emergency response procedures and internal coordination, identify areas for improvement in its business continuity preparedness, and take appropriate measures to further strengthen its response capabilities.

■ Toward International BCMS Certification

A Business Continuity Management System (BCMS) is a framework designed to prepare organizations for events that could disrupt business operations by establishing the policies, organizational structures, and procedures necessary to maintain and restore critical business functions, while continuously improving their business continuity capabilities.

SBI EVERSPIN is currently preparing to obtain international BCMS certification. Through internal education, practical exercises, and the continued development of its organizational framework, the Company aims to establish an effective response system that both ensures employee safety and strengthens business continuity.

SBI EVERSPIN will continue to enhance its business continuity preparedness to support the stable provision of services to its customers and remain committed to delivering cybersecurity solutions that customers can use with confidence.

■ About SBI EVERSPIN

SBI EVERSPIN is a technology company that develops and provides AI-based cybersecurity solutions. As a member of the SBI Group, the Company supports customers, including financial institutions, by helping them respond to cyber threats, enhance security operations, and improve business continuity.

Guided by its vision, “Building Trust for the Age of AI,” the Company will continue to help build a safe, secure, and sustainable digital society through the development of its Trust Layer Platform, designed to support continuous security operations in the age of AI.
